

DUVEKA.MODULE

Business Central administration, simplified.

duveka BC Administration brings the everyday tenant administration tasks closer to the people who actually run the system. User management, role setup, environment overview and configuration tasks, all in one practical place.

Microsoft Dynamics 365 Business Central - duveka GmbH - May 2026

Business Central administration, simplified.

duveka BC Administration brings the everyday tenant administration tasks closer to the people who actually run the system. User management, role setup, environment overview and configuration tasks, all in one practical place.

Administration tasks in one place.

Standard Business Central administration is split across the admin centre, the role centres and a series of less obvious pages. duveka BC Administration consolidates the recurring tasks into a single, practical area. New user provisioning, permission set assignment, environment information and configuration overviews are accessible without hunting through Microsoft documentation.

Built for partners and key users.

Most companies do not have a full time Business Central administrator. The work falls to a key user or to a partner. duveka BC Administration is designed for that reality. The tasks are presented clearly, the dangerous ones are clearly marked, and the routine ones are quick to perform.

Logs and visibility for compliance.

Administrative actions need to be traceable. duveka BC Administration logs the relevant actions so internal IT and external auditors can see who did what. The result is more confidence in the administration of your tenant and fewer surprises when an audit comes around.

What duveka BC Administration consolidates.

duveka BC Administration is a quality of life module for everyone who maintains a Business Central environment.

- User and permission set management
- Environment and configuration overview
- Common administration tasks in one place
- Logging of administrative actions
- Designed for partners and key users

Who installs it.

Companies running Business Central without a dedicated administrator. Partners managing several tenants for end clients. Internal IT teams that want a faster path through the routine tasks. duveka BC Administration removes friction from one of the least loved areas of Business Central life.

power on your business.
