

DUVEKA.MODULE

DATEV connectivity for Business Central.

duveka DATEV Connector bridges Microsoft Dynamics 365 Business Central and DATEV. Postings, accounts and master data move between the two systems on a defined schedule, no manual export needed.

Microsoft Dynamics 365 Business Central - duveka GmbH - May 2026

DATEV connectivity for Business Central.

duveka DATEV Connector bridges Microsoft Dynamics 365 Business Central and DATEV. Postings, accounts and master data move between the two systems on a defined schedule, no manual export needed.

Send postings to DATEV without leaving BC.

Many German companies run their bookkeeping in Business Central and their tax advisor on DATEV. The handover used to be a manual export and a hopeful upload. duveka DATEV Connector closes that gap. Postings are formatted to the relevant DATEV format and transmitted through the connector, so the tax advisor receives clean data and the office stops zipping CSV files.

Configurable per chart of accounts and tax setup.

Every company has its own chart of accounts and tax mapping. duveka DATEV Connector is configurable, so the mapping between Business Central and DATEV reflects your specific setup. Account ranges, cost centres and tax codes are mapped once and the connector handles every export afterwards.

Full visibility on what was sent.

Logging matters. duveka DATEV Connector keeps a clean record of what was sent, when and with which result. Retransmissions are simple, the audit trail is complete and questions from the tax advisor can be answered with the original transmission.

Why this connector exists.

Bookkeeping and tax processes only run smoothly when the systems behind them talk reliably. duveka DATEV Connector is the working bridge between Business Central and DATEV.

- o DATEV ready posting export
- o Configurable account and tax mapping
- o Scheduled transmission
- o Clean logging and retransmission support
- o Built for German bookkeeping practice

Who uses it.

German companies running Business Central with a DATEV based tax advisor. Mid market businesses that want to keep the bookkeeping in BC and the tax process in DATEV without daily friction. Accounting offices that maintain multiple Business Central tenants for clients and need a reliable handover process.

power on your business.
