

DUVEKA.MODULE

IPPC compliance for wood packaging, integrated with Business Central.

duveka IPPC supports the documentation and certification requirements of the International Plant Protection Convention for wood packaging directly inside Microsoft Dynamics 365 Business Central.

Microsoft Dynamics 365 Business Central - duveka GmbH - May 2026

IPPC compliance for wood packaging, integrated with Business Central.

duveka IPPC supports the documentation and certification requirements of the International Plant Protection Convention for wood packaging directly inside Microsoft Dynamics 365 Business Central.

ISPM 15 documentation in your ERP.

Wood packaging used in international trade has to be heat treated or fumigated according to ISPM 15 and marked with the IPPC stamp. duveka IPPC keeps the supporting documentation, the treatment evidence and the registration data structured inside Business Central, so audits and customs inquiries can be answered without searching through cabinets.

Linked to your packaging and timber processes.

duveka IPPC sits on top of the duveka Packaging and duveka Timber stack. Treated wood, certified pallets and containers carry their compliance status into the warehouse, the sales document and the shipment, so the right material always lands on the right export job.

Made for export packers and timber traders.

Companies in scope of ISPM 15 cannot afford a blocked container at the border. duveka IPPC is built for the kind of operations where wood packaging crosses borders daily and compliance has to be a fact, not an aspiration.

What duveka IPPC structures.

duveka IPPC turns IPPC and ISPM 15 compliance into a documented, repeatable process inside Business Central.

- o ISPM 15 treatment and certification data per pallet or container
- o Linkage to duveka Packaging and duveka Timber
- o Audit ready evidence for customs and authorities
- o Status visibility from warehouse to shipment
- o Document storage via duveka DMS

Who needs duveka IPPC.

Export packers. Pallet producers selling into international supply chains. Timber traders shipping treated material across borders. Anyone whose containers can be opened at customs and whose paperwork has to stand up to inspection.

power on your business.
