# Storage cost calculation that earns its keep.

duveka Storage Cost extends Microsoft Dynamics 365 Business Central with proper time based storage cost handling. Free days, period boundaries, customer specific tariffs and clean invoicing, all integrated with the standard warehouse process.

Microsoft Dynamics 365 Business Central - duveka GmbH - May 2026

# Storage cost calculation that earns its keep.

duveka Storage Cost extends Microsoft Dynamics 365 Business Central with proper time based storage cost handling. Free days, period boundaries, customer specific tariffs and clean invoicing, all integrated with the standard warehouse process.

---

## Storage cost the way logistics actually charges it.

If you store goods on behalf of others, storage is part of the deal and part of the invoice. duveka Storage Cost calculates the right amount per period, per item and per customer. Free days, daily, weekly and monthly tariffs are all part of the standard configuration, no side calculation in Excel.

## Period delimitation done correctly.

Charging storage cost cleanly across month and year boundaries is one of those problems that look easy until you try to do it right. duveka Storage Cost handles period delimitation properly, so an item that arrived in October and left in January contributes the right cost to October, November, December and January, not one large lump sum.

## From posting to invoice without manual steps.

duveka Storage Cost is built on top of warehouse postings. Receipts, shipments and transfers feed the calculation automatically, and the resulting cost lands on a project journal or sales line ready for invoicing. The accounting team stops chasing the warehouse and starts trusting the numbers.

---

## Why storage cost deserves a dedicated module.

Time based storage cost cannot be done with standard pricing logic alone. duveka Storage Cost adds the engine that fits the way real warehouses bill.

- o Daily, weekly and monthly storage tariffs
- o Free day logic per agreement
- o Clean period delimitation across month and year
- o Direct connection to warehouse postings
- o Output ready for project journal or sales invoice

## Who relies on duveka Storage Cost.

Third party logistics providers. Consignment warehouses. Container depots. Pool operators. duveka Storage Cost is the natural companion to duveka Framework Agreement, used by everyone who turns warehouse activity into invoiced revenue.
