

DUVEKA.MODULE

Pool management for reusable packaging and shared assets.

duveka Pooling brings transparency and discipline to packaging pools and other shared assets inside Microsoft Dynamics 365 Business Central. Track who owns what, where it sits, and how it moves between you, your customers and your suppliers.

Microsoft Dynamics 365 Business Central - duveka GmbH - May 2026

Pool management for reusable packaging and shared assets.

duveka Pooling brings transparency and discipline to packaging pools and other shared assets inside Microsoft Dynamics 365 Business Central. Track who owns what, where it sits, and how it moves between you, your customers and your suppliers.

Pools as first class objects in your ERP.

Most ERPs treat returnable packaging as an inventory headache. duveka Pooling treats it as a managed asset. You define pools per customer, supplier or carrier, register the assets in each pool and track every movement against the right account. The result is a clear running balance instead of a quarterly reconciliation crisis.

Movements that match the real world.

Pooled assets move out with deliveries and back with collections, sometimes via third parties. duveka Pooling captures these movements at the document where they belong: shipment, return, collection or transfer. Combined with duveka Tour, the routes are documented and the pool balance reflects the truck.

Reporting your customers will accept.

Pooling disputes usually come down to evidence. duveka Pooling produces clear reports per pool, per customer and per period. You can show the inflow, the outflow and the current balance in one view, with the underlying documents one click away.

Why pooling needs its own module.

Standard inventory tools were not designed for assets owned by someone else. duveka Pooling fills that gap.

- o Pool definition per customer, supplier or carrier
- o Movement tracking on shipments, returns and transfers
- o Running balance per pool with full audit trail
- o Reports that hold up in customer disputes
- o Integration with duveka Tour and duveka DMS

Where it earns its keep.

Pallet and container pool operators. Logistics providers managing customer owned assets. Manufacturers and traders that ship in reusable packaging and want to stop losing money on missing equipment. duveka Pooling is the structured answer to a problem that usually lives in spreadsheets.

power on your business.
