

DUVEKA.MODULE

Pallets, packing instructions and 3D loading plans, all in Business Central.

duveka Versandeinheiten gives Microsoft Dynamics 365 Business Central a complete shipping unit system. Calculate pallet requirements, print customer specific labels and produce real 3D loading plans through EasyCargo.

Microsoft Dynamics 365 Business Central - duveka GmbH - May 2026

Pallets, packing instructions and 3D loading plans, all in Business Central.

duveka Versandeinheiten gives Microsoft Dynamics 365 Business Central a complete shipping unit system. Calculate pallet requirements, print customer specific labels and produce real 3D loading plans through EasyCargo.

From sales line to physical pallet, automatically.

Behind every sales order there is a real pallet on a real truck. duveka Versandeinheiten reads your sales lines, calculates the right shipping units, generates customer specific stacking instructions and prints the labels that warehouse and customer expect. The order processing team does not need a calculator and your loading dock does not improvise.

3D loading plans that actually load the truck.

Through the EasyCargo connection, the module produces real 3D loading plans for trucks and containers. Dimensions, weights and stacking properties feed in from your articles and packaging masters, the layout comes back as a plan your driver can use. The result is fewer half empty trucks, fewer damaged loads and fewer surprises at the customer.

Native fit with Tour and DMS.

Pallets do not exist in isolation. duveka Versandeinheiten links to duveka Tour for routing, to duveka DMS for archiving labels and loading plans, and feeds back into the standard Business Central shipment workflow. One ecosystem, one set of master data, one clean shipping process.

Where the savings come from.

duveka Versandeinheiten attacks the everyday losses in shipping: bad pallet calculations, manual labels, half empty trucks and missing customer instructions.

- o Automatic pallet and shipping unit calculation
- o Customer specific labels and stacking instructions
- o Real 3D loading plans via EasyCargo
- o Metric and imperial unit support
- o Connections to duveka Tour and DMS

Industries that need it.

Manufacturers shipping goods on pallets every day. Packaging companies whose customers demand specific stacking and labelling. Trading companies running international transports where a 3D plan saves a real container. If your shipments are always bigger or trickier than a single sales line suggests, duveka Versandeinheiten pays for itself quickly.

power on your business.
